

Welcome to Staffing Industry Analysts' 2012 Industry Thought Leadership Series

SIA Industry Thought Leadership Series

Today Suppliers Of Staffing Services Share Their Expertise

Staffing Industry Analysts Industry Thought Leadership Series provides the perspective of the suppliers of staffing services. The views expressed in this webinar are those of the sponsor and not necessarily that of Staffing Industry Analysts.

Sponsored by

This report is intended to provide an overview of general business information relative to global employment conditions and considerations. It should not be interpreted as legal advice. Please consult with a lawyer to ensure that you are in compliance with all applicable laws.

Agenda

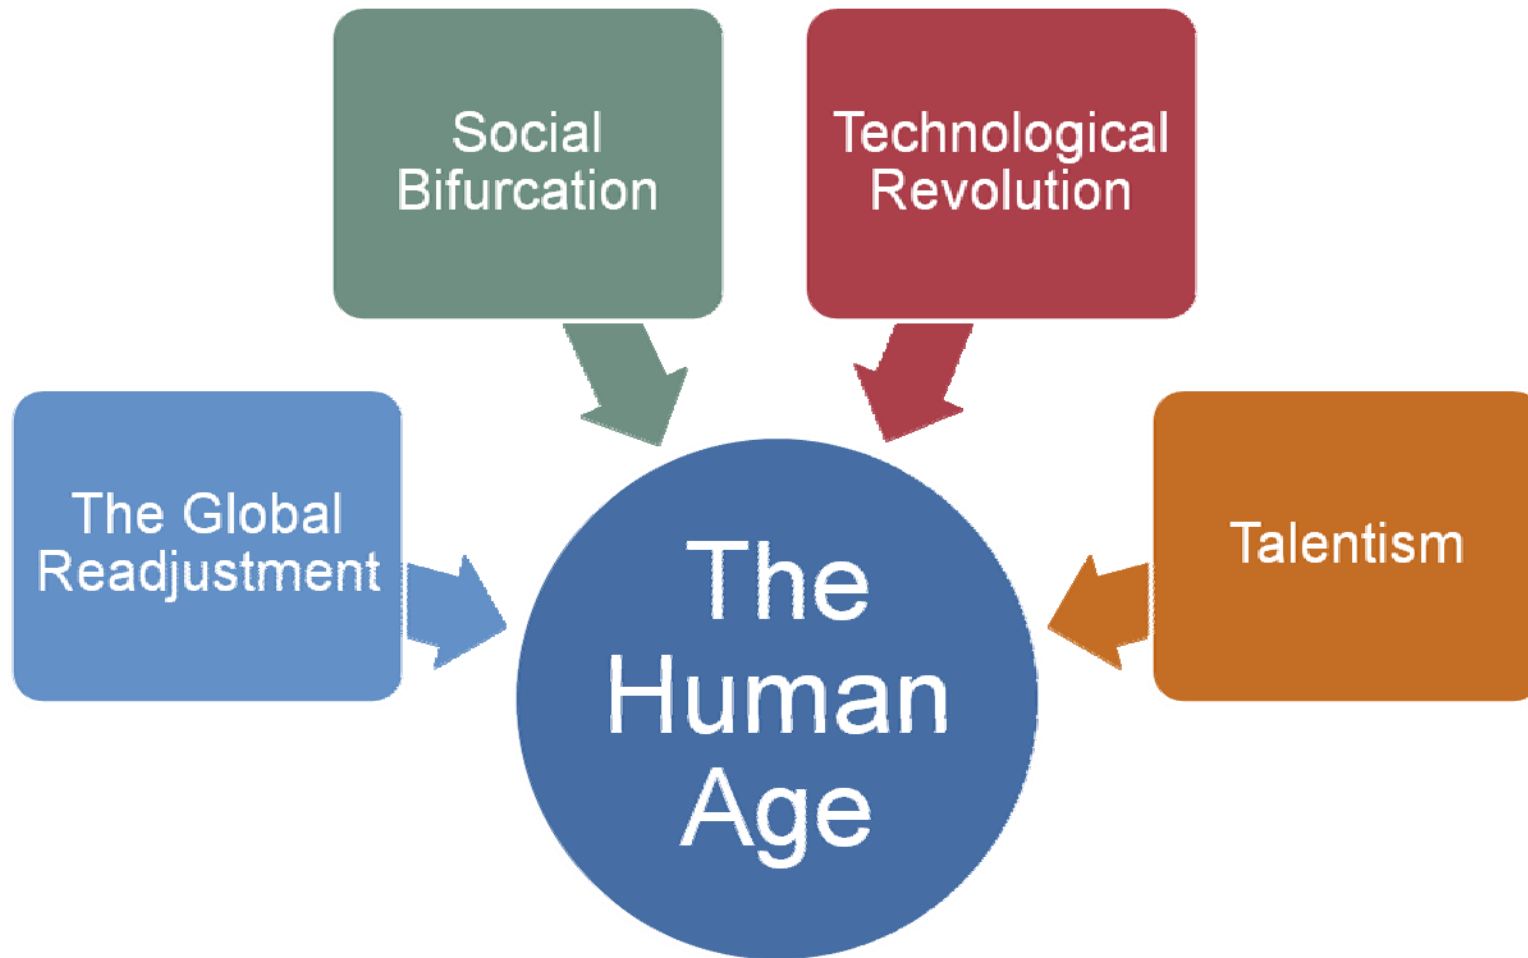

- Overview of Global Trends
- Global Program Considerations
- Recommendations and Best Practices
- Q&A

Overview of Global Trends

Macro-Economic Forces Changing the World

Our research, conversations with key business & government leadership, and leading economists point to four key economic forces that will shape the world ahead...

A "Mix" of Varied Labor Sources...

Full-Time
Employees

Benefits

- Knowledge retention
- Continuity
- Loyalty
- Fixed costs

Drawbacks

- Difficult to address peaks and valleys
- Difficult to address new skill needs
- Greater long-term investment

Contract Resources

Benefits

- Quick to start
- Targeted duration
- Acquire unique skills
- Enables scalability

Drawbacks

- Limited tenure
- Knowledge leaves with contractor
- Supply/Demand swings

Project / Outsourced
Resources

Benefits

- Hire the experts
- Faster time to market
- Less Project Mgmt required

Drawbacks

- Requires tight requirements definition
- Dependency on third-parties
- Can be "blank check"

And It's Not Just About Cost...

	Business Need	Skill Sets	Duration & Timing	Cost/Other
Full-Time Employees	<ul style="list-style-type: none"> • Default hire type • Critical business function • Core competency • Key alignment with business goals/objectives 	<ul style="list-style-type: none"> • Common skill sets • Freely available in market • Professional development opportunities exist 	<ul style="list-style-type: none"> • Extended tenure (i.e., not short term assignment) • Sufficient lead time to recruit for resource 	<ul style="list-style-type: none"> • Consider cost of hire vs. cost of contingent labor • Group does not experience significantly high turn-over
Contract Resources	<ul style="list-style-type: none"> • Non-core business functions • Supplements business objectives • Use in high turn-over groups and skills categories 	<ul style="list-style-type: none"> • Unique skill sets • Scarce availability or difficult to recruit skills in market 	<ul style="list-style-type: none"> • Shorter duration (i.e., less than 18 months) • Longer duration may still qualify depending on business objective • Limited lead time for recruitment 	<ul style="list-style-type: none"> • Consider cost of hire vs. total cost of ownership (TCO) • Use when existing full time resources have expertise and bandwidth to directly manage activities
Project Based Resources (SOW)	<ul style="list-style-type: none"> • Critical AND time dependent activity 	<ul style="list-style-type: none"> • Market expertise required 	<ul style="list-style-type: none"> • Definable duration • Short to medium duration activities • Time critical activities 	<ul style="list-style-type: none"> • Best value vs. lowest cost • Consider opportunity cost or other gained efficiencies
Outsourced Resources (SLA)	<ul style="list-style-type: none"> • Non-core business activities • Core activities where business has been unable to support 	<ul style="list-style-type: none"> • Activities where efficiencies can be gained through aggregation and/or leverage 	<ul style="list-style-type: none"> • Ongoing business functions 	<ul style="list-style-type: none"> • Evaluate TCO to include efficiencies gained by outsourcing provider • Consider additional value gained from outsourcer

Q1-12 Global Trends Overview

	Global	The Americas	Europe, Middle East, & Africa	Asia Pacific
Labor Regulations	Increasing		Increased parity requirements	Continued restrictions on contract duration and engagement
Workforce Utilization	Increasing	Decreased unemployment	Increased productivity, but continued labour shortages in certain skills and markets	Continued labour shortages in certain skills and markets
Vendor Capability	Increasing		Increased experience & understanding in Europe	
Technology Capability	Increasing		Increased by regulations & geography	Increased language & geography
Economic Conditions	Challenging	Slow Economic Recovery	Ongoing Euro Crisis	Continued challenges in emerging markets
Environmental Conditions	Challenging	Earthquakes & Tornadoes		Earthquakes & Floods
MSP Adoption	Increasing	Increased in LATAM	Increased across Northern and Southern Europe	Increased across the region
Workforce Planning Impact	Positive	Opportunity and Ability in Latin America continues to increase, particularly in Brazil and Mexico	Opportunity and Ability across Europe continues to increase, with demonstrated growth in key Africa markets	Opportunity and Ability across APAC continues to increase, despite necessary modifications to local market regulatory guidelines

Benefits of MSP Continue to Improve and Expand Globally

The global contingent workforce is increasing, particularly in emerging markets.

- Increased complexity of legislation
- Need for accurate worker classification

Supporting technologies are becoming globalized

- VMS providers are expanding their markets
- Oracle's acquisition of Taleo changes the global scope of HCM software

Skilled labor shortages and shifting migrant worker policies

- Borderless Talent and localized delivery of global workforce strategy

Globally, vendors are gaining an understanding of MSP

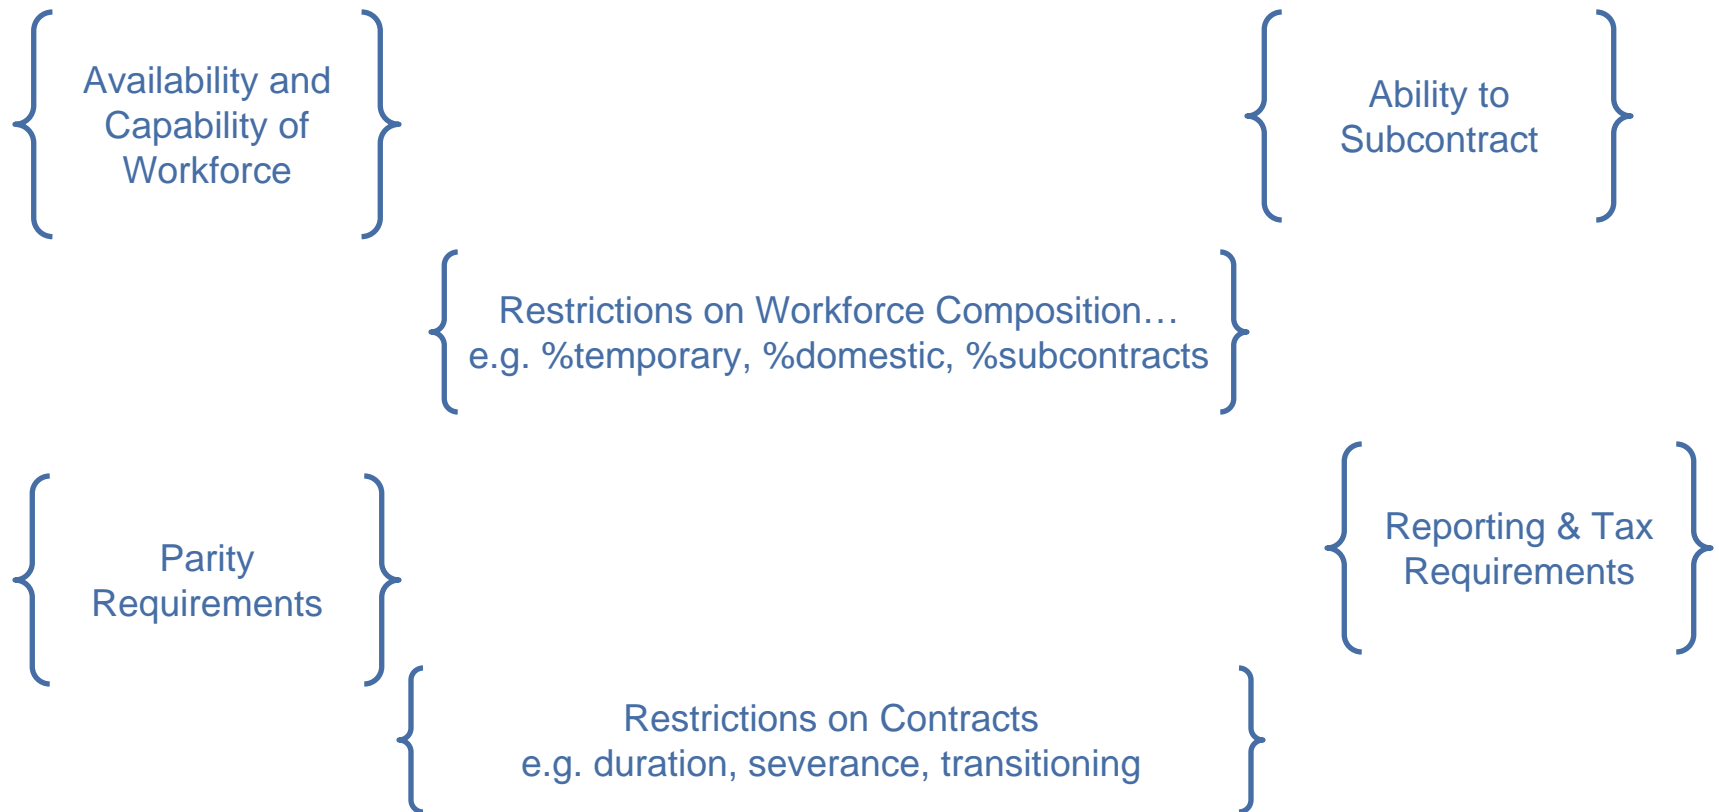

- Improving vendor performance in the supply chain.

Global Program Considerations

Why Won't This Work Globally?

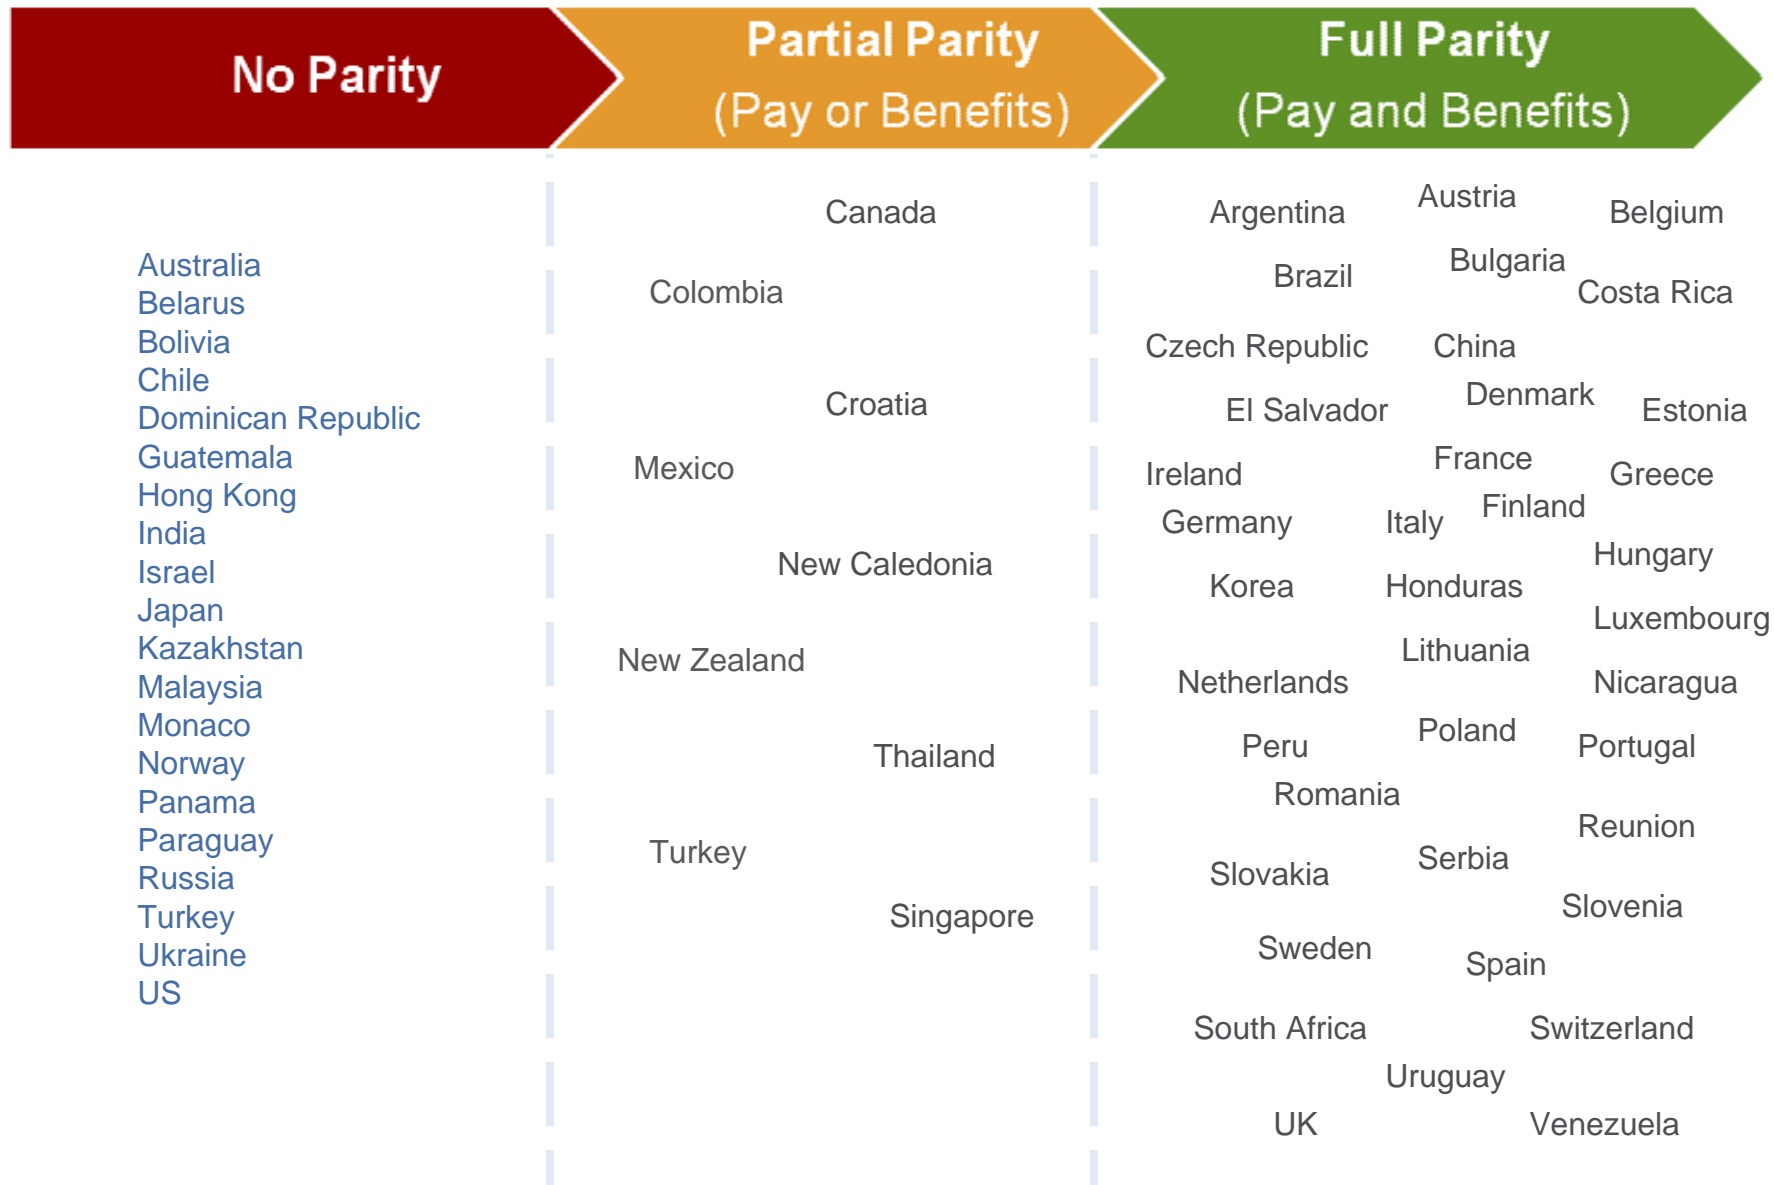

Workforce dynamics are evolving and complex - and they vary by country and region – for example:

Global Contingent Labor Landscape for MSP

Parity Regulations Continue to Increase Globally

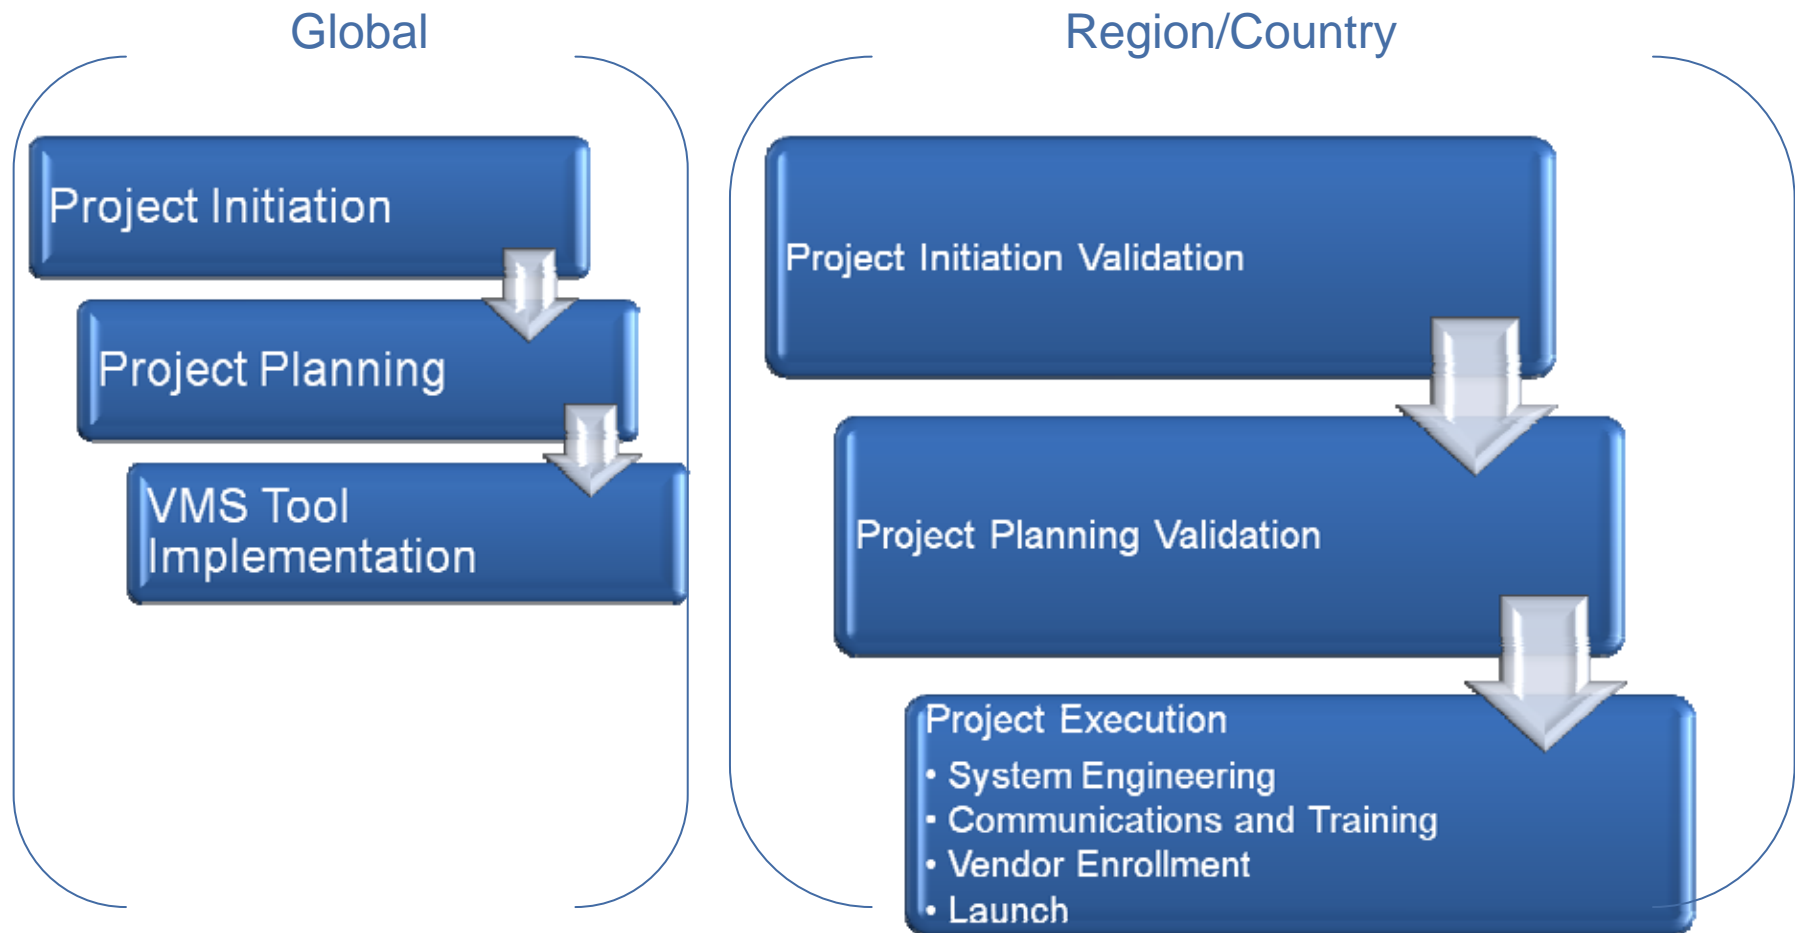

Best Practices & Recommendations

The Global Approach

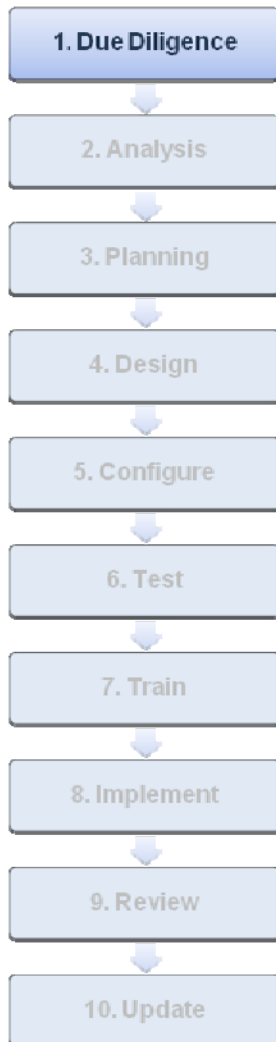

Think Global..... Act Local

There are 10 Steps Essential to Globalization

Establish and Communicate

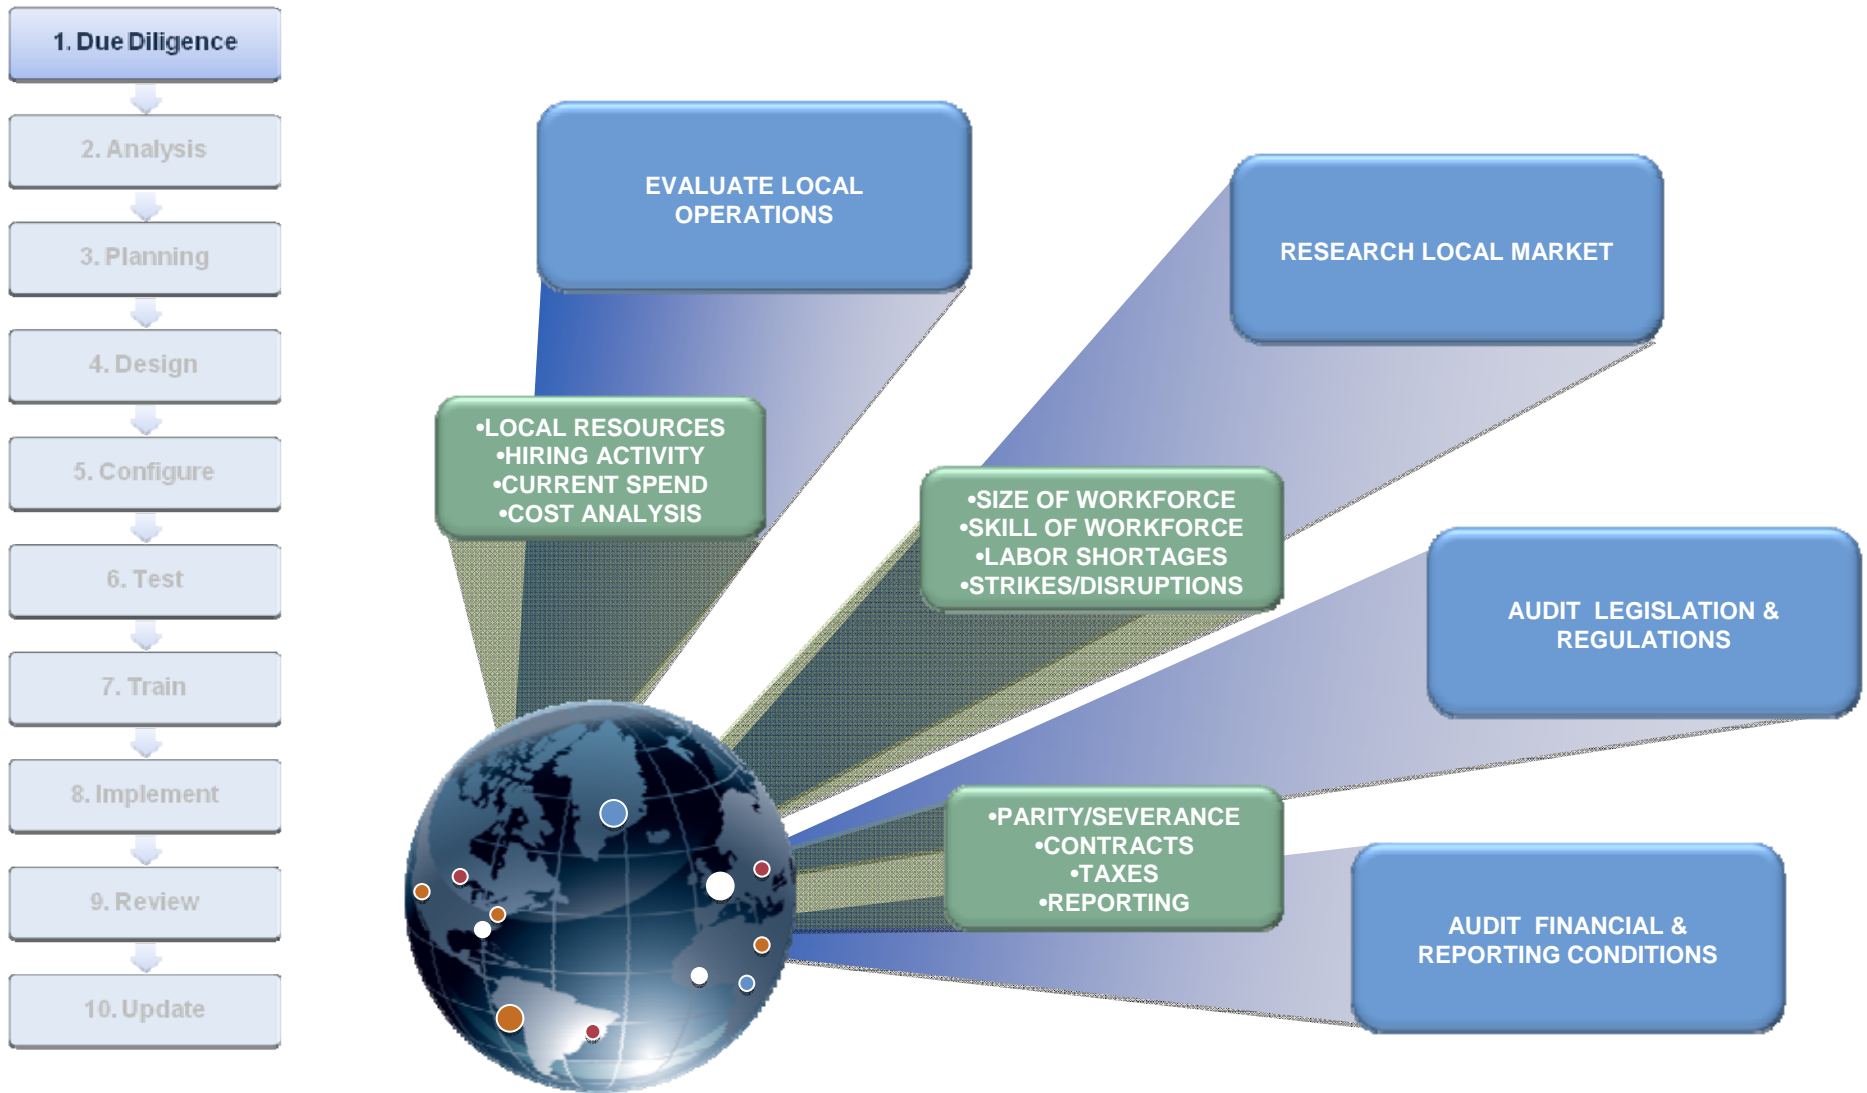

It is essential that you identify an Executive Sponsor within your organization.

This sponsor can assist in driving the corporate discussions that are required in order to gain consensus on critical issues such as:

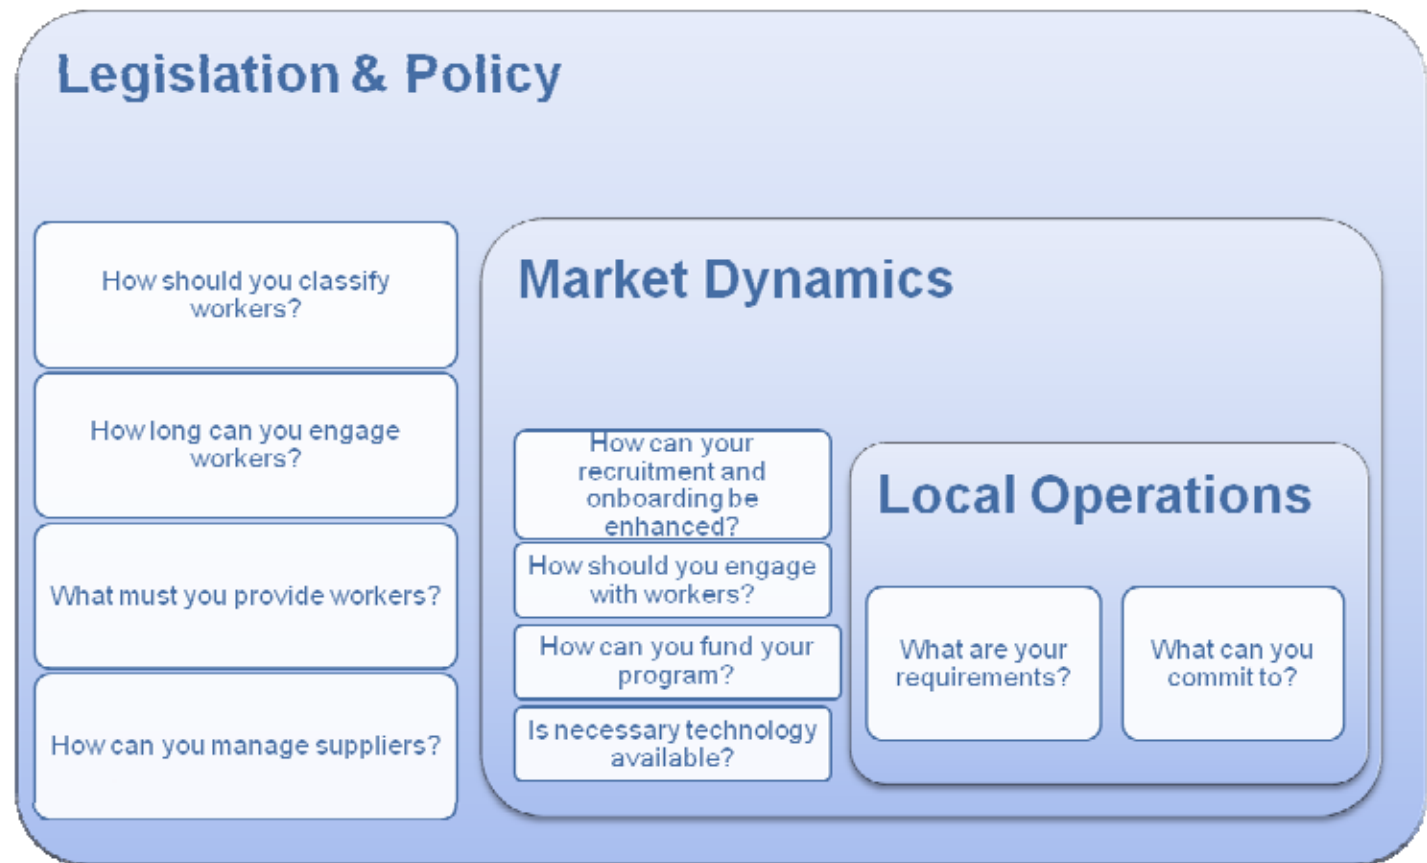

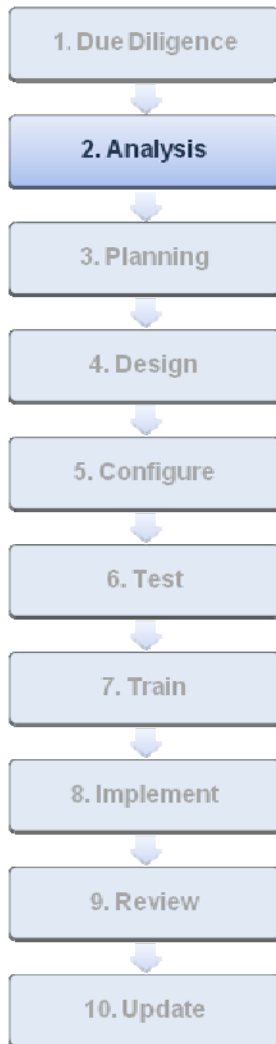

- Whether or not to mandate the program
- Whether the program will be centralized vs. decentralized
- Which groups, operations, and work categories will be in scope

Ongoing communication of decisions, plans, and what is to come is a critical component of a successful MSP deployment and should be a priority in every step of the process.

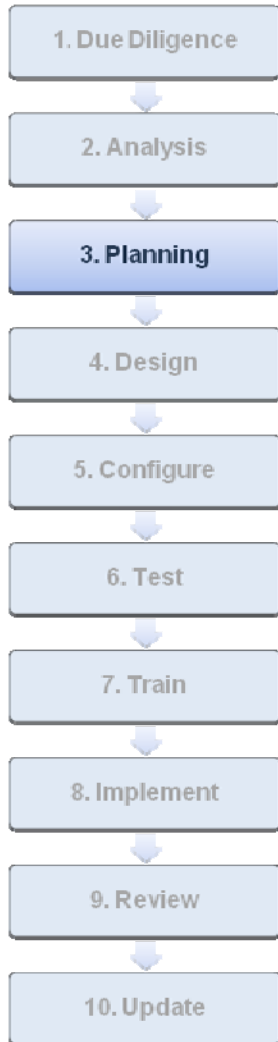

Do Your Homework

Know What it Means

Evaluate Priorities

Purpose

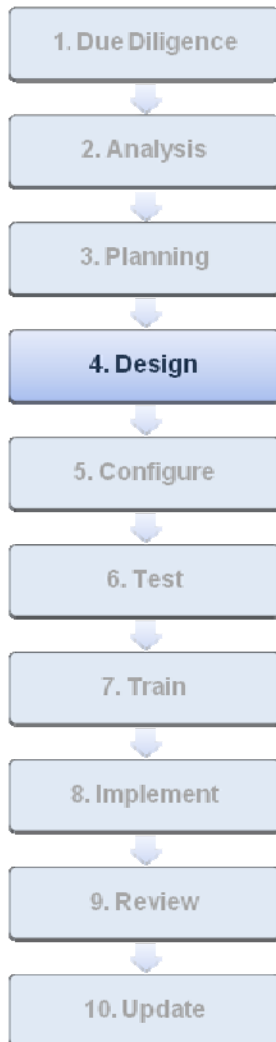

- Define how business is done today
- How technology supports the process
- Understand policy and procedures
- Identify process efficiencies and savings opportunities - “Value Proposition”

Key Activities

- Identify Subject Matter Experts (SMEs)
- Establish communications and project plan
- Rank objectives based on internal and external considerations

Map it Out

Purpose

- Finalize workflows
- Gather data necessary to implement technology
- Document and discuss transition strategy of applicable business rules and SLA

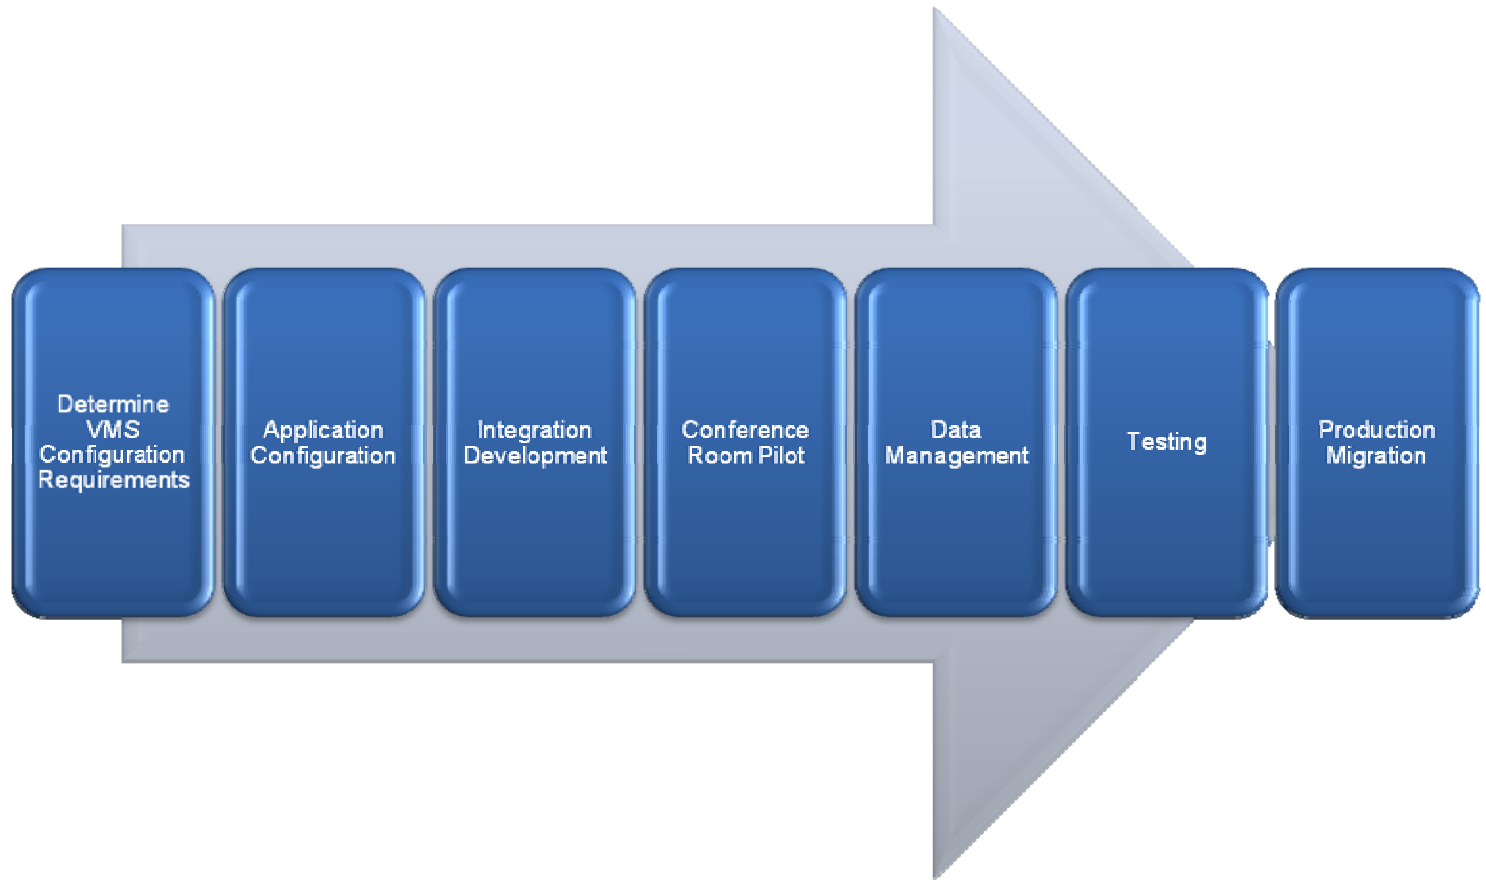

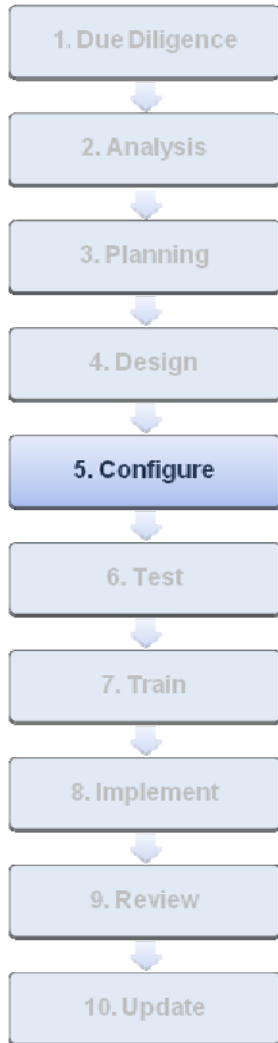

Key Activities

- Distribute contractor data-gathering templates
- Working session with project leaders to review workflows
- Gather org unit data (locations, projects, charge codes, etc.)

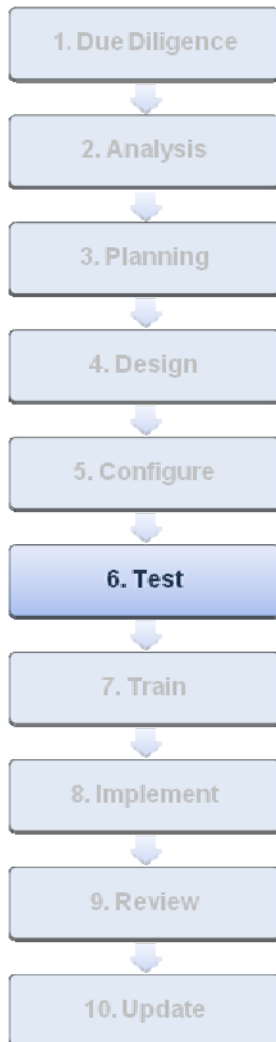

Key Deliverables

- Future State Design Package
- Application Configuration Workbook
- Data Requirements Document
- Business Rules and SLA
- Integration Requirement Document, if needed

Modify and Finetune

Testing 1,2,3...

Purpose

- Finalize application configuration
- Test workflows , SSO and integrations, if necessary

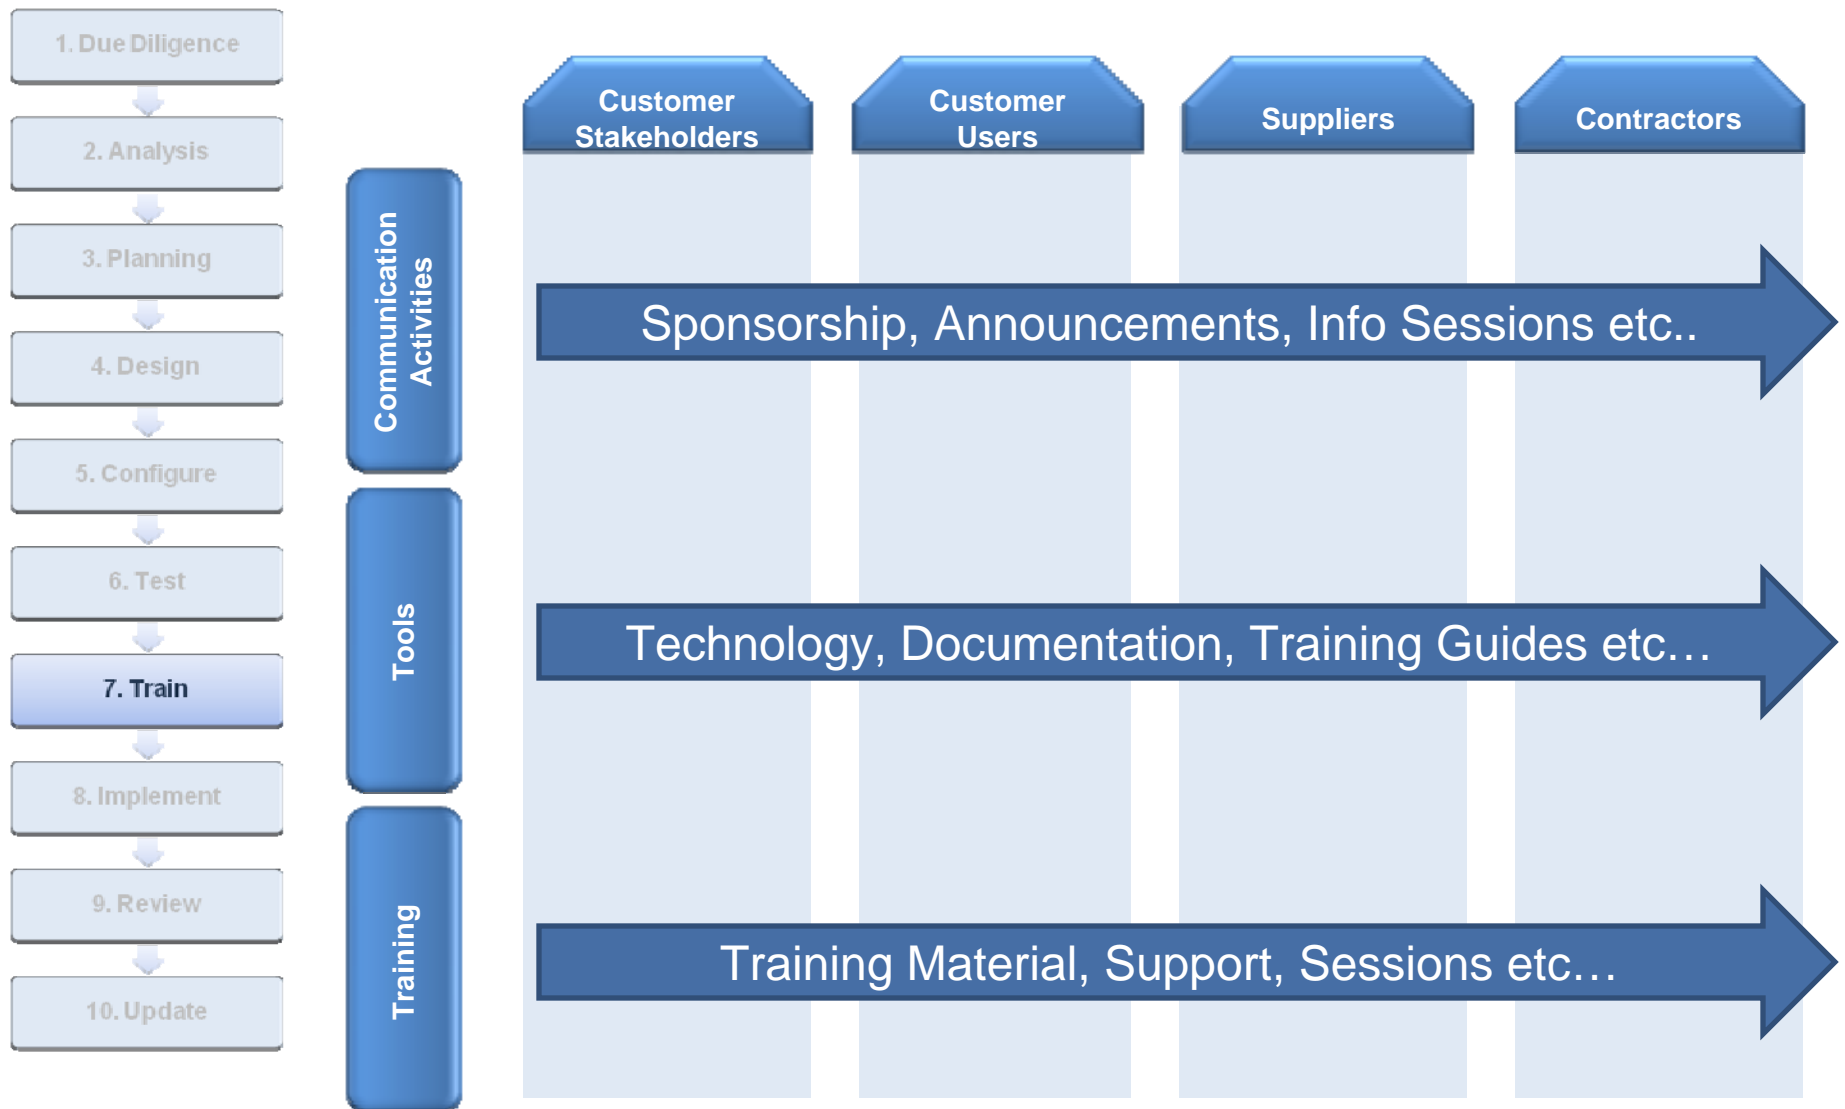

Key Activities

- Conference Room Pilot to validate workflows
- System Testing and UAT, if necessary
- Integration Testing
- Data Load

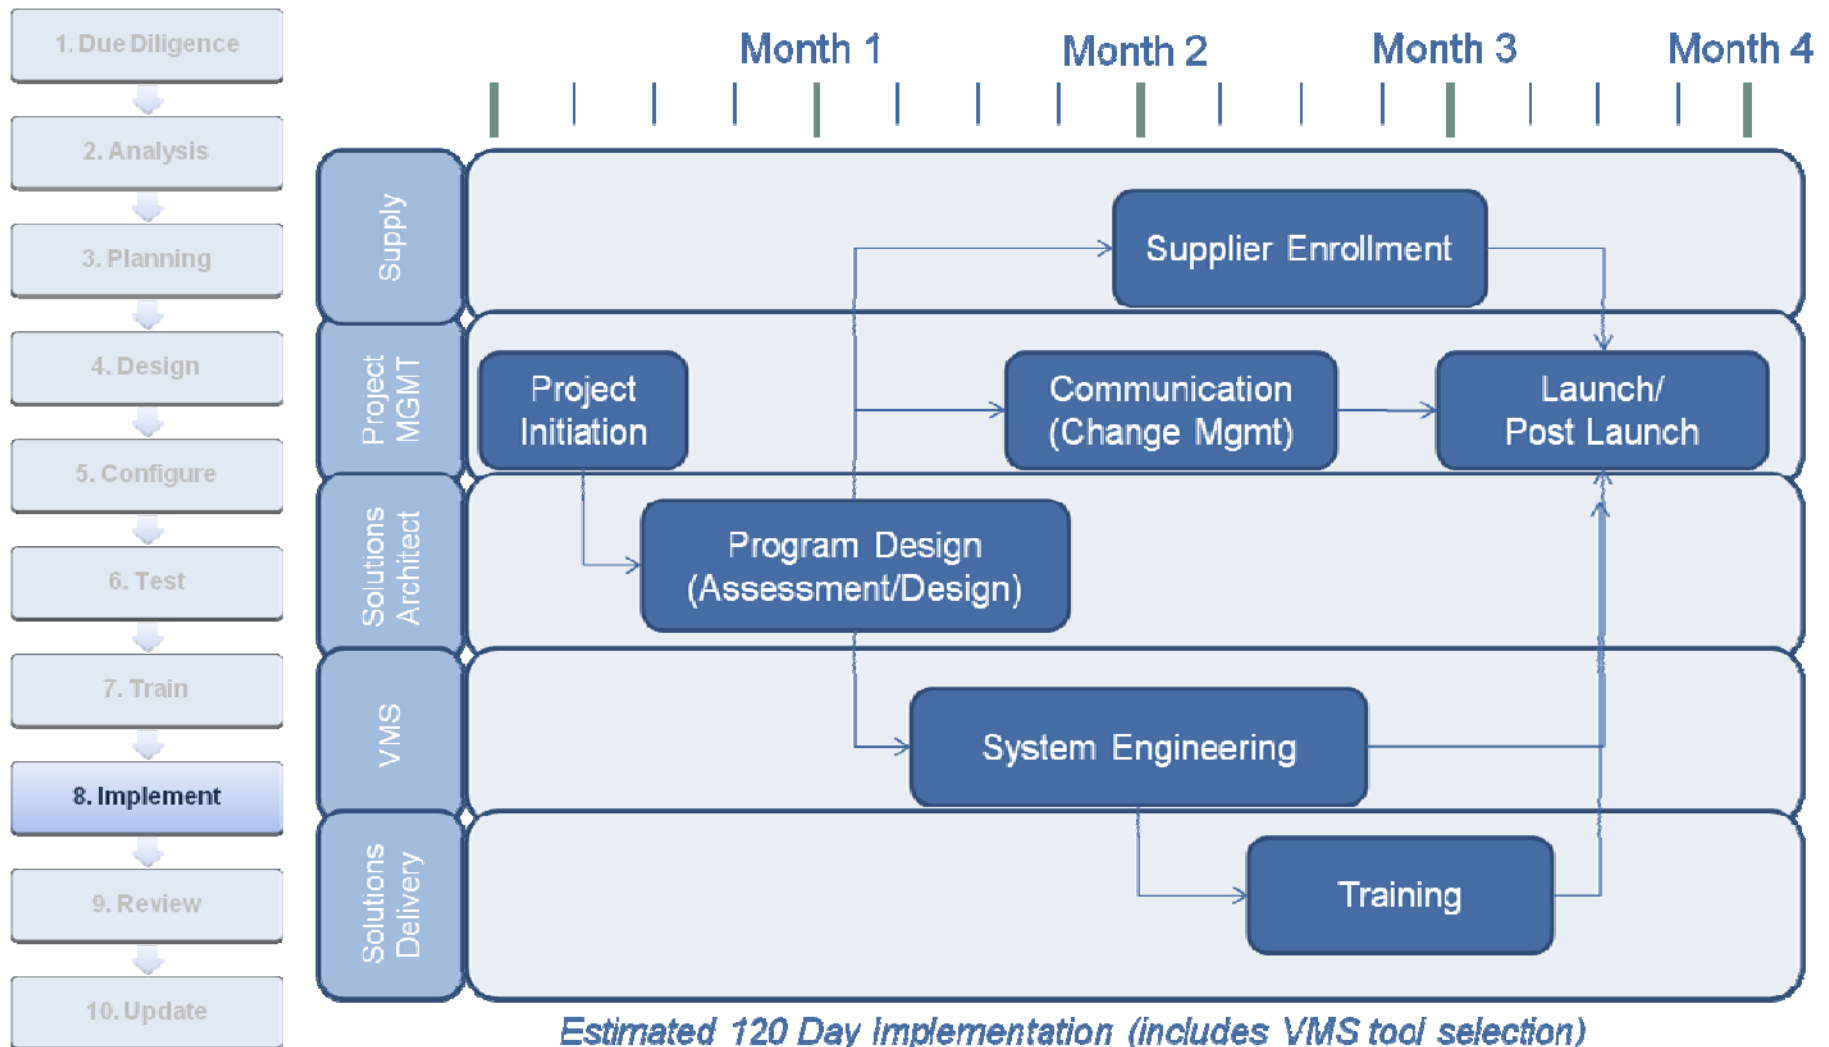

Key Deliverables

- Conference Room Pilot Report
- Testing Acceptance Package
- Application Readiness Package

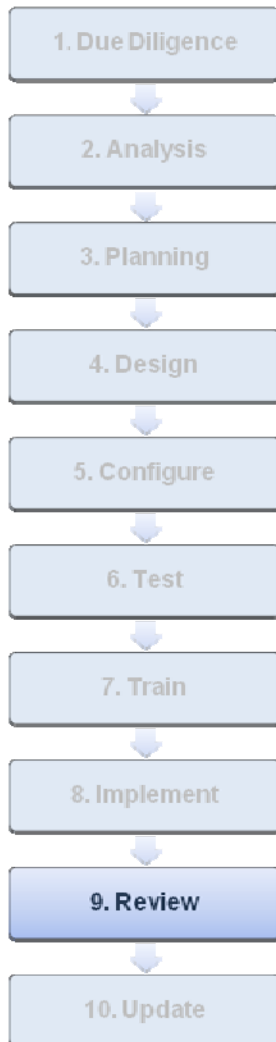

Can You Hear Me Now?

The Devil is in the Details

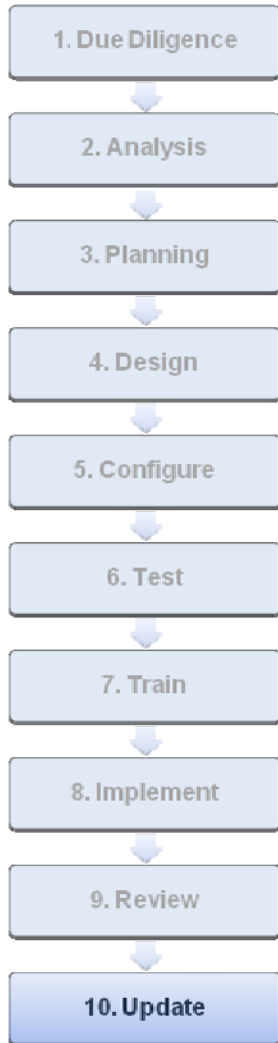

Double Check

- Define operational readiness criteria
- Defining operational acceptance criteria
- Validation the following project stages and phases have been completed:
 - Stage 1 Initiation
 - Stage 2 Planning
 - Phase 1 System Engineering
 - Phase 3 Optimization
 - Phase 4 Supplier Enrollment
- Validate:
 - Supplier agreement approved
 - All launch items and action items resolved
 - Production environment active and all data loaded
- Validation of launch communications documents by:
- Project Quality Review

Things Change

Regional Highlights

Update on MSP in Americas

Size of the labor force*:

North America

- Considerations: maturity of the MSP market, common language, and flexible legislation
- Funding: can often be supplier-funded
- Master Vendor: widely accepted
- Vendor Neutral: widely accepted
- Hybrid: emerging for Light Industrial & Admin/Clerical
- Example: Provincial law in Canada can impact cost of program and increase fees

South & Central America:

- Considerations: emerging MSP market, disparate regulations, and complex restrictions on contract labor
- Funding: can often be supplier-funded
- Master Vendor: widely accepted
- Vendor Neutral: emerging for Professional
- Example: Parity requirements and tax policies in Mexico can impact cost of program and increase fees

*Size of labor force based on January, 2011 as reported by CIA Factbook

**Relative rank calculated based on active regulations related to contractual terms, costs or labor and termination, hiring and firing restrictions, and enforced consequences

Update on MSP in EMEA

Size of the labor force*:

Western Europe:

- Considerations: maturity of the MSP market varies by country, and increased AWR, parity requirements, tax policy, and contractual terms
- Funding: can sometimes be supplier-funded
- Master Vendor: widely accepted
- Vendor Neutral: commonly used for Professional
- Hybrid: emerging for Light Industrial & Admin/Clerical

Central Europe & Middle East:

- Considerations: emerging MSP market, disparate regulations, complex requirements for contingent workers, and political dynamics
- Funding: can occasionally be supplier funded
- Master Vendor: widely accepted in EU and ME
- Vendor Neutral: emerging in EU for Professional & Admin/Clerical
- Hybrid: slowly emerging in EU across multiple categories

*Size of labor force based on January, 2011 as reported by CIA Factbook

**Relative rank calculated based on active regulations related to contractual terms, costs or labor and termination, hiring and firing restrictions, and enforced consequences

Update on MSP in APAC

Size of the labor force*: <1 million 1-5 million 5-10 million 10-25 million 25-50 million 50-100 million 100-250 million 250-500 million > 500 million

Asia-Pacific:

- Considerations: emerging MSP market, rigid workforce regulations, and complex restrictions on contract labor
- Funding: rarely supplier funded due to low margins
- Master Vendor: widely accepted
- Vendor Neutral: emerging for Professional & Admin/Clerical
- Hybrid: slowly emerging across multiple categories.
- Example: Minimal margins of suppliers across the region make supplier funded models nearly impossible - new models are evolving and often based on annual licensing fees.

*Size of labor force based on January, 2011 as reported by CIA Factbook

**Relative rank calculated based on active regulations related to contractual terms, costs or labor and termination, hiring and firing restrictions, and enforced consequences
