## HIGH-VOLUME STAFFING CREATES COMPLEX CHALLENGES

High-volume staffing situations, like light-industrial manufacturing, require reliable and skilled workers to maintain operational excellence. Procurement and HR executives must juggle the complex tasks of finding, managing and tracking non-employee workers and multiple suppliers in the face of last minute demands, rapidly changing scenarios and fluid scheduling, including multiple shifts and varying seasons, peak workloads, and economic considerations.

## FUNCTIONALITY THAT MEETS THE DEMANDS

The fastest growing Vendor Management System (VMS) spend category for Global 2000 companies is Statement of Work (SOW) and Projects. IQNavigator VMS supports light-and heavy-industrial environments through the use of unique requisition types and streamlined workflows making effective spend management for industrial labor a reality.

The IQNavigator Vendor Management Solution (VMS) is a scalable, secure technology platform that enables sourcing, tracking and management of high volume, non-employee workers.

Learn more about how to manage this growing and complex area of spend today by downloading our Light Industrial Category Expertise and SOW case studies.
